

Medicap Pharmacy always makes time for you

Medicap Pharmacy in New London offers customers prescription service, medication counseling and the opportunity to be a true partner in health care. For the past twenty years Jim and Cathy Jernegan have been small business owners of the only true apothecary shop in town. Don't look for flip flops and fly swatters at their store, as Medicap offers only health related items with an emphasis on customer service.

Jim worked as an intern for Pichel-meyer's Pharmacy and then for Iver Rudie for thirteen years before opening their first store. The old A&W Restaurant was razed and Jim and Cathy's first store was built. It stood 800 square feet, complete with lace curtains and flower boxes filled with red geraniums. Their new facility was built after purchasing the house next door; on the same corner of Mill and

Douglas Streets, next to New London Family Medical Center.

"We are certainly not a one-man show here; we are truly thankful for reliable, steady employees who make us look good each and every day," explains Cathy.

With a staff of 25 highly skilled and dedicated individuals, Medicap caters to customer needs in every way, including delivering prescriptions to home bound individuals within 25 miles of town. Medical management of long-term health issues is a priority at Medicap.

The staff at Medicap is dedicated to helping customers achieve the best health care possible, offering Medication Therapy Management, patient education, diabetes care, customizing your medications (compounding), long term care, and a private patient consultation room.

"Some patients require medications that are not available at bigger, chain stores, and cannot be special ordered. We take care of those special orders and strive to keep the prices of those needs down," says Jim.

The Jernegan's and their staff will always make time for you and look forward to being of service. They know you depend on them for the answers to medication and health care questions. They truly want to be your healthcare partners.

"We went into this business knowing we could create a special niche in our community and fulfill needs that weren't being addressed. Our business is really all about the people and what we can do for them. Every day we know we have changed someone's quality of life for the better;" adds Cathy.

Your Healthcare Partner
